WHERE 200,000 PALLETS A MONTH ARE BROUGHT BACK TO LIFE

BY REVAMPING AND REINSTATING OLD PALLETS BACK TO LIFE NOT ONLY ARE WE DOING WHAT WE DO BETTER THAN ANYONE ELSE IN THE UK BUT ALSO GIVE OUR CUSTOMERS A CHOICE THAT CAN TRANSFORM THEIR BUSINESS FOR THE BETTER.

It's common for companies to see Pallet cost savings of up to 40% when they have moved away from Pallet pools, new pallets and into recycled pallets.

What a lot of people don't know is that Reconditioned pallets are often even stronger than new pallets, this translates into further cost saving because there are no repairs.

We divide our build teams into Reconditioned and New Pallet specialists. Most companies use the same personnel for both jobs but because we understand that specialisation increases quality we keep each build team focussed solely on their individual endeavours, this mean that our customers end up with an unsurpassed level of expertise and understanding of their needs. The quality of our work is unrivalled.

The importance of this cannot be overstated. The difference between a mediocre reconditioned pallet and an excellent one can be up to 10 additional round trips.

Our state-of-the-art wood recycling facility in the centre of England is most likely the largest disassembling and component recovery facility in the UK and one of the most advanced in Europe. From here, every month more than 200,000 pallets are brought back to life.

Licensed by the **Forestry Commission**, our heat treatment conforms to worldwide standards and specifications.

These pallets carry the stamp of approval from the Forestry Commission and **WOODVENTURE** is one of the first recycling companies to operate this system. **WOODVENTURE's** heat treatment kills all wood pests and eliminates the export of these pests nationally and internationally – protecting the environment and the world's valuable forestry resources.

WOODVENTURE is fully accredited to supply ISPM-15 Heat Treated Pallets to over 40 countries world-

HOME OF THE BEST QUALITY NEW PALLETS IN THE UK

When new pallets are required our fully automated manufacturing system will ensure complete uniformity for the specification needed with affordability being the key.

We have a team in place that will understand your requirements and translate them into the exact pallets you need. Maybe your pallets must be used in a racking system or on in automated plant where uniformity is vital or in the food industry with its attendant requirements.

The effectiveness of your pallets are vital and nothing can be left to chance, as such before we start the manufacturing stage we design all new pallets using a CAD system to ensure that the loads, dimensions, material and design are fit for purpose. You will

find that we are extremely passionate and thorough about giving you the best pallets.

Our team have an enormous experience pool to draw down from, with over 35 years combined time

within the industry. There's nothing that we haven't seen or dealt with in the past and we will bring all this experience to bear when designing, manufacturing and putting the delivery and repair process together.

Because logistics and planning co-exist so closely with pallet supply we work with a specialist pallet transportation company that covers the entire country and will ensure that your pallets are delivered to the right places, picked up and returned to wherever they need to be or returned to us when repairs are required.
